

10YFP Update 9 December 2016

DECISIONS

10YFP demonstrating progress and impact indicators defined

The 10YFP Monitoring and Evaluation (M&E) task force, chaired by Finland /SBC programme, has agreed on 20 indicators for the 10YFP. Such a framework aims to support the 10YFP actors and other stakeholders working on SCP: (i) assess and improve performance to inform the planning of activities and allocation of funds; and (ii) report and demonstrate progress to show accountability towards all actors and donors, communicate results to the wider public, and mobilise political and financial support. The framework is available [here](#).

The first data collection and reporting effort will start in January 2017.

The 10YFP interagency coordination group nominates new IACG co-chairs

The 10YFP interagency coordination group (IACG) nominated UN-Habitat and UNEP as the new co-chairs, during the meeting in Paris on 2nd and 3rd of November. The IACG also discussed the involvement of UN agencies in the 10YFP, coordination on relevant targets of the 2030 agenda, coordination and collaboration at country level, information sharing and communications, among others. The meeting report will be made available on the 10YFP website.

10YFP trust fund: Launch of the Sustainable Food Systems call for proposals

The Theme of the Call for proposals is “Tackling the food and nutrition challenge through multi-stakeholder collaboration – Adopting a systems approach to promote sustainability along the food value chain”. The closing date for applications is 15 January 2017, 23:59 Central European Time (CET). More information on the call for proposals can be accessed on the SCP clearinghouse.

The SFS call is piloting a streamlined trust fund call for proposals process.

The [Beijing Declaration on Sustainable Tourism as a driver of Development and Peace](#), adopted in May 2016 at the First World Conference on Tourism Development organized by the Government of the People’s Republic of China and the World Tourism Organization (UNWTO), recalled the role of the 10YFP Sustainable Tourism Programme in encouraging the shift towards green growth and sustainable development. Further, the declaration called upon governments to integrate and prioritize sustainable consumption and production in national planning and policymaking, including tourism, to accelerate the shift towards more sustainable consumption and production patterns.

ACHIEVEMENTS

The upgraded Global SCP Clearinghouse has been launched!

Revamped tools and functionalities allow members to easily find out who is doing what, and where, on SCP; share their work with a global community; and find people and groups to work with. The 10YFP programmes have dedicated hubs to communicate on their programmes and how to engage. If you are already registered, your account has been transferred, and you just need to create a new password. If not registered, [come sign up today!](#)

Sustainable Tourism Programme committed to fight climate change – COP 22

The role of tourism in implementing the Paris Agreement was on the table on the occasion of the 22nd Session of the UNFCCC Conference of Parties (COP22). The International Symposium of the Sustainable Tourism Programme of the United Nations 10-Year Framework of Programmes on Sustainable Consumption and Production (10YFP), held during COP 22, discussed how to advance Sustainable Tourism in a Changing Climate. Press release [here](#).

Costa Rica establishes a National Sustainable Public Procurement Committee

Costa Rica has established a National SPP Committee and has enacted the decrees supporting the implementation of the national SPP policy. SPP guidelines and training materials have been drafted. The national policy foresees the implementation of an ecolabelling scheme, the development of measures to facilitate the participation of small and medium enterprises on SPP, and the promotion of research and trainings.

I NEED YOU!

10YFP demonstrating progress: data collection and reporting to be launched in January 2017

The first data collection and reporting effort based on the '10YFP demonstrating progress and impact framework' will be launched in January 2017. As established by the 10YFP task force on monitoring and evaluation, the reports of the 10YFP programmes are due to be submitted to the 10YFP secretariat by 15 February 2017. The 10YFP secretariat and the chair of the task force will be holding webinars on the framework and on the reporting in December and January. The 10YFP secretariat kindly asks the relevant actors to support the programme coordination desks in this effort.

Global survey on Tourism planning

The 10YFP Sustainable Tourism Programme kindly asks National Focal Points and Partners of the thematic programmes to circulate the ongoing [Global Survey on Tourism Planning](#) within their networks and forward it to appropriate authorities in the national government, local government, private sector or civil society organizations who are responsible for tourism planning.

The survey is being carried out within the framework of the 10YFP Sustainable Tourism Programme and aims to identify current practices and methods in national tourism planning, as well as tools or guidelines used by the private sector and civil society in measuring and monitoring tourism's performance – all with a view to advance in the preparation of Guidelines to Integrate Sustainable Consumption and Production into Tourism Planning. Please find the link to the survey [here](#)

Consultations on Hotspots analysis methodological framework

The 10YFP Consumer Information for SCP programme would be grateful for the other 10YFP programmes to share the consultation documents with their network, as relevant.

As part of the 10YFP CI-SCP, a UNEP/SETAC Life Cycle Initiative project is developing a methodological framework and communications guidance for product and sector level 'hotspots analysis', a process to identify and address key sustainability risks and benefits in a value chain; online consultation until December 15th.

Please find the link to the consultation documents [here](#).

Contact: Cecilia.lopezyroyo@unep.org

Webinar with GIZ in the framework of the Asia-Pacific GPP and Ecolabelling project, 22 December 2016, 10:00am-11:30 am CET

The purpose of this webinar is to present GIZ activities in the Asia-Pacific region. The webinar will also address the work of the 10YFP CI-SCP Working Group 2 focusing on Type I Ecolab.

CISCP@unep.org

High-level Regional Training Workshop on the Implementation of Green Public Procurement and Ecolabelling, 15-17 December 2016, Beijing, China

This workshop is organized in collaboration with the China Environmental United Certification Center of the Ministry of Environmental Protection of the People's Republic of China (MEP CEC), in the framework of the project "Strengthening the capacities and improving the knowledge on green public procurement and ecolabelling in the ASEAN+3 region", implemented by UN Environment, with the support of the Ministry of Environmental Protection of the People's Republic of China (MEP), and the Korea Environmental Industry and Technology Institute (KEITI). This project seeks to set up an exchange and cooperation programme that allows transfers of know-how and experience on voluntary labelling and GPP at the Asia-Pacific level. This training will gather experts from the European Union and North America, and will provide participants with expert knowledge and tools to successfully design and manage GPP policies and ecolabelling schemes in their country.
